

## Blooming Bulb Garden

Item #20426

Bright colorful blooms welcome spring to your home. A patio or porch is the best location for your bulb garden, the cooler temperatures will prolong the bloom time. You can also place them in a cool room of your home with plenty of indirect light. For best performance keep the soil moist, but not wet. After your flowers finish blooming, the bulbs can be planted in your garden to be enjoyed next year!

### How to Grow Indoors:

- Indirect light

- Cool home temperature 60-65 F

- Moderately moist soil

### How to Grow Outdoors:

- Place outdoors on your patio

- Moderately moist soil

- Plant outdoors after flowering

- Plant in Sun or Part Sun

- Space 6" apart, depth 3-4"

- Grows 6-18" tall
